

The first
Cradle to Cradle Certified^{CM}
keyboard assemblies. Ever.

Computer Support Tools | Cradle to Cradle Certified Keyboard Assemblies

details

Performance that's kind to earthlings.

You want it above the worksurface edge? OK. Below the worksurface edge? OK. How about really close to the worksurface to save space? Sure. You see, we also really babied the ergonomic performance to help baby your company's most important assets: your people.

Sustainability that's kind to the earth.

The combination of this Mechanism, Platform and Palm Rest was really babied to be better: recycled materials (very little virgin raw materials) were used in their construction. Then, years from now, it can be recycled to create other products of equal or greater value. It's a closed material loop in which we pull very little virgin raw material from the environment and send very little back to it. That's what Cradle to Cradle Certified is all about.

Go here: <http://www.mbdc.com/>

Range and Proximity

As workstations get smaller, there is less room to push away from the worksurface. Gone are the days of the 10' x 10' cubicle with a 30"+ deep worksurface. Typically workstations now have a 24" deep surface and a 90 degree configuration. Close proximity to the worksurface edge affords easy access to writing surfaces, flat panel monitor arms, phone, filing, etc. And that's precisely what these keyboard assemblies deliver: better performance and better proximity. They're simply better than ever.

Materially better.

An environmental perspective.

Mechanisms:

- 98-99% recyclable

Keyboard Platforms:

- 100% recycled Kraft paper content

Palm Rests:

- Environmentally friendly waterborn Urethane
- 100% recyclable

Swivel Mouse Pad:

- 100% recyclable ABS & Nylon plastic

5" Lift and Lock Mechanism w/ 23" track

- Height adjustment range of 8.3": 2.5" above the track and 5.8" below the track
- Worksurface proximity: 3.25" at worksurface height

7" Lift and Lock Mechanism w/ 26" track

- Height adjustment range of 10.8": 3.0" above the track and 7.8" below the track
- Worksurface proximity: 4.5" at worksurface height

19" Platform with right mousing and Green-Gel Palm Rest

- Available in Left, Right, Dual and Articulating Mouse configurations
- Supports MS Natural Keyboard Platform (w/o Palm Rest)

Enviro™ Platform with integrated mouse retention fence/wire management and Green-Gel Palm Rest

- Reversible Platform for left or right mousing
- Supports MS Natural Keyboard Platform (w/o Palm Rest)

Stella Standard with 20" Track

- Requires 20" worksurface depth clearance
- Height adjustment range: 3.5" above the track and 5" below the track.
- Tilt +/- 15°

Stella Extended with 23" Track

- Requires 24" worksurface depth clearance
- Height adjustment range: 3.5" above the track and 5" below the track.
- Tilt +/- 15°

Obligatory and important basic feature information.

Cradle to Cradle Certified

Enviro™ Keyboard Platform

- Reversible Platform for left or right mousing
- Supports MS Natural Keyboard Platform (w/o Palm Rest)
- Same-plane, compound-swiveling mouse surface w/ Green-Gel Palm Rest
- Patent-pending integrated mouse retention/wire management
- 100% recycled kraft paper content

19" Keyboard Platform

- Available in Left, Right, Dual and Articulating Mouse configurations
- Supports MS Natural Keyboard Platform (w/o Palm Rest)
- Same-plane, compound-swiveling mouse surface w/ Green-Gel Palm Rest
- Patent-pending integrated mouse retention fence/wire management
- 100% Recycled kraft paper content

Articulating Mousing Surface

- Offers 6 different height positions
- Mouse surface can be positioned over the 10 key and on the same horizontal plane as keying surface

Cradle to Cradle Certified^{CM} is a certification mark of MBDC.
